

## PIPSTA009 – LINERLESS LABEL APPLICATIONS WITH PIPSTA

---

Each Pipsta comes complete with a roll of linerless label media. This media differs from traditional label stock in several important ways. The media:

- comes in a variety of colours,
- is continuous, so labels of any (reasonable) length can be produced,
- can be applied, removed and re-applied to surfaces many times,
- has a greater roll length than comparable label media with backing,
- has no backing-paper waste, owing to the silicone coating on the print-side,
- leaves no residue when removed.

There are many applications for this media. Consider the following non-exhaustive list:

- Sticky memos
- Name badges
- Banners for displays, noticeboards etc.
- Merits and rewards that can be transferred to wall charts
- Removable hints, scores, feedback etc. in exercise books and assignments
- Adhesive QR Codes for subsequent scanning with smart phones
- Disposable RFID/NFC tickets with bespoke print for access control, pre-pay systems etc.

For more information on linerless label media, its uses and demonstrations, please visit [www.pipsta.co.uk](http://www.pipsta.co.uk).

We would love to hear how you are using your Pipsta with linerless label media: tweet your application to @pipsta or visit our Pipsta Facebook page.
